## Objectives

RRDCSC aims to instill in the students the value of work and love for the soil through the utilization of idle and unproductive lots in all public schools of Negros Oriental and the replicating communities. Its ultimate goal is to maximize the productivity of school gardens and other water resources in order to:

- 1) complement the administration's thrust for food production towards sustainable agriculture;
- 2) provide additional income and food supply for the School Feeding Program;
- 3) provide significant contribution to alleviate malnutrition among school children;
- 4) serve as a vehicle for relevant education for students and their family;
- 5) further enhance the socio-cultural well-being of the people and the community as well.
